

The **GAM<sup>®</sup> Movement Verification System (GMVS)** enables the user to adhere to the mandatory movement requirements of the **NAIS** program.

The **GAM<sup>®</sup> Movement Verification System (GMVS)** is a web based, online application designed to offer subscribers a virtual IT infrastructure that is scalable, flexible, and extensible to support your business needs related to movement of NAIS required data into the centralized National Animal Identification Database.

**Global Animal Management, Inc. (GAM)** is a wholly owned subsidiary of Schering-Plough Animal Health Corporation providing data management services to the livestock industry. GAM offers products and services for individual or group animal identification, data collection, storage, processing, analysis and reporting. We combine the right people, products and processes to deliver solutions that provide value to our customers to comply with industry regulations or capture commercial market opportunities.

PROVIDING DATA MANAGEMENT SOLUTIONS TO THE LIVESTOCK INDUSTRY

# GAM<sup>®</sup> Movement Verification System (GMVS)

▶ **BENEFITS**

A system that provides users with a standardized interface to support the National Animal Identification System (NAIS) mandatory movement requirements, and will interface with the National Animal Identification Database.

A professional technical staff specializing in database management, system administration, system backups, and business continuity manages the **GAM<sup>®</sup> Movement Verification System**.

Seamless integration means you can access the **GAM<sup>®</sup> Movement Verification System** with one simple sign-on, and all applications are just one click away.

The **GMVS** is easy to use. All you need is a connection to the Internet and a web browser.

Access to **GMVS** is available anytime (24x7x365).

▶ **FEATURES**

Access to the States **GMVS** can be single or multiple point to accommodate users at distributed locations.

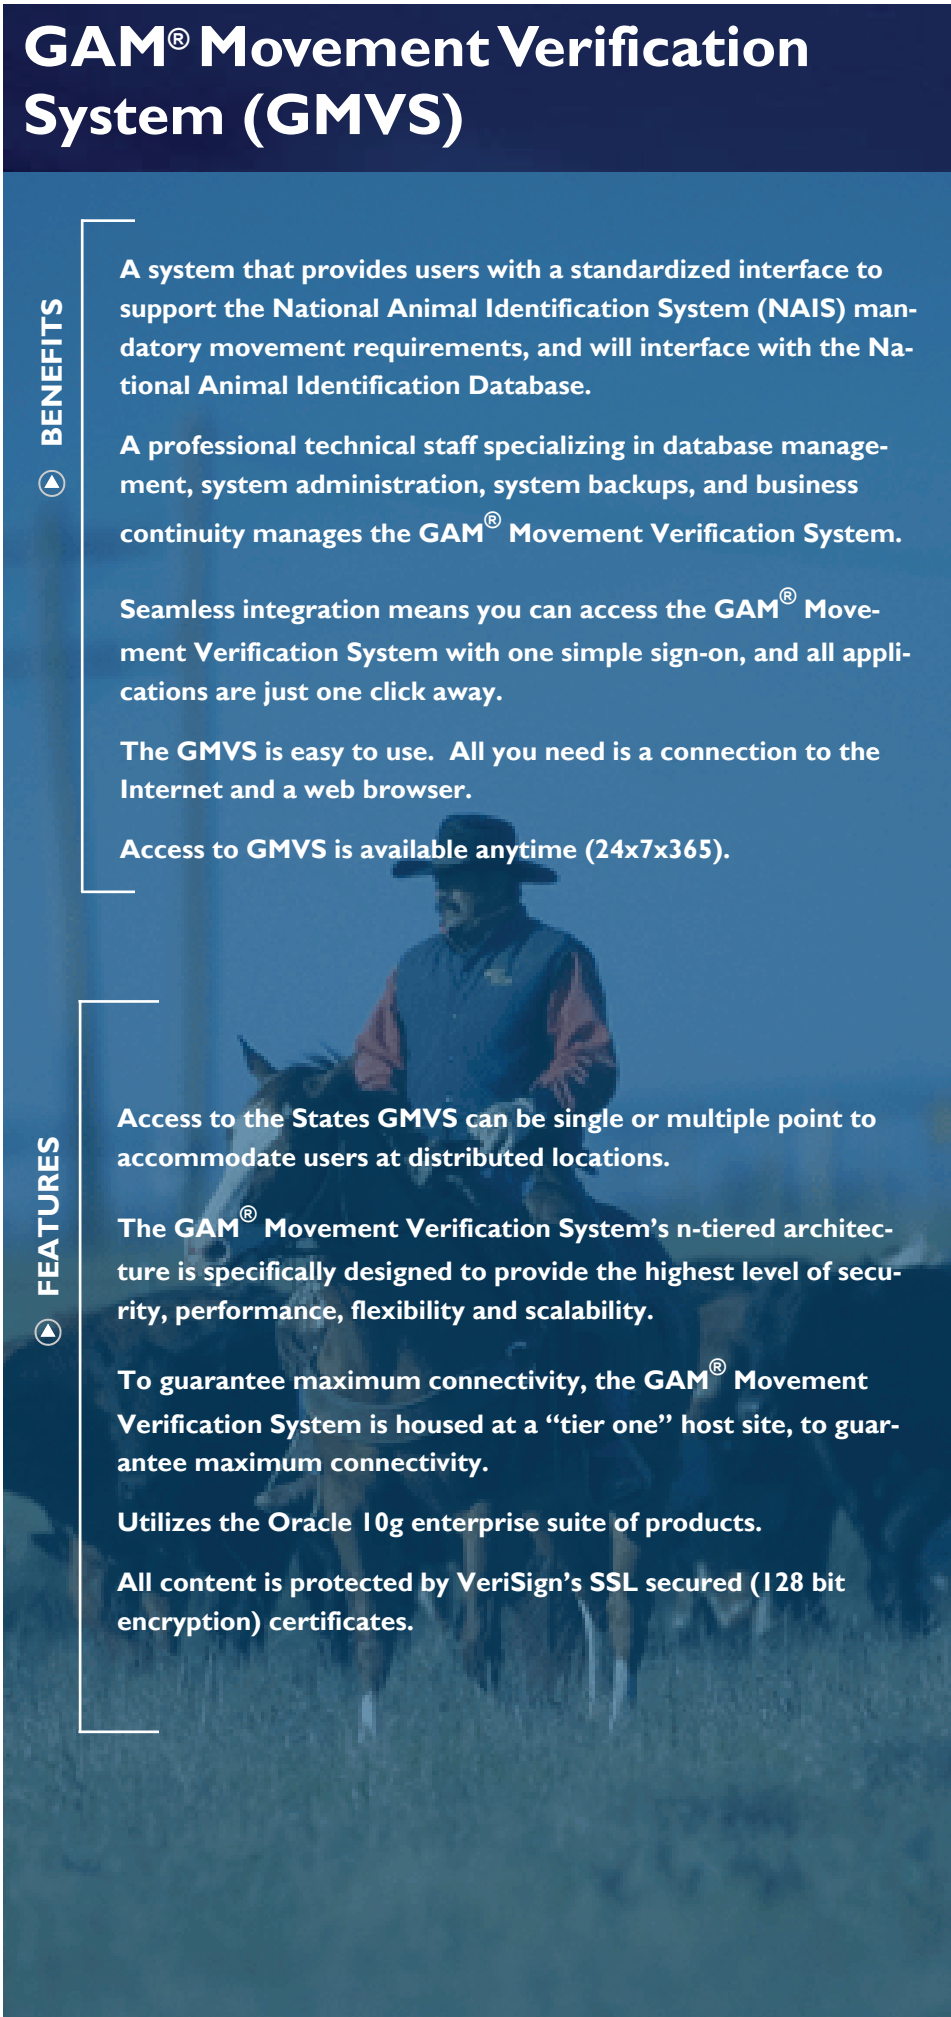

The **GAM<sup>®</sup> Movement Verification System's** n-tiered architecture is specifically designed to provide the highest level of security, performance, flexibility and scalability.

To guarantee maximum connectivity, the **GAM<sup>®</sup> Movement Verification System** is housed at a "tier one" host site, to guarantee maximum connectivity.

Utilizes the Oracle 10g enterprise suite of products.

All content is protected by VeriSign's SSL secured (128 bit encryption) certificates.

## SYSTEM REQUIREMENTS

Access to the GAM<sup>®</sup> Movement Verification System requires a PC with Windows 95/98/ME/2000 or XP operating system; an Internet connection; and a web browser.

GAM<sup>®</sup> MOVEMENT VERIFICATION SYSTEM

The screenshot displays the National Animal Identification System (NAIS) web interface. It features a search bar at the top with a 'Reset' button and a 'GO' button. Below the search bar, there are two main sections: 'Group Movements' and 'Animal Movements'. Each section has an 'Upload' and 'Create' button. The 'Group Movements' table lists events such as 'Begin Group/Lot', 'Moved Group/Lot in', 'Sighting Lot', and 'Moved Group/Lot out'. The 'Animal Movements' table lists individual animal movements with columns for Animal ID Number, Event Type Code, Reporting Premise ID, Event Date & Time, Species, and Animal Breed.

Lot ID Number	# Animals	Event Type Code	Premise ID	Event Date & Time	Species	Group Type
0030N43122003	150	1 - Begin Group/Lot, Group/Lot of animals was established at a premise	003DNAM	200301241000	BOV	S
F436S78050403	87	2 - Moved Group/Lot in, Group/Lot of animals moved into a premise	003DNAM	200411220600	BOV	S
0030N43122003	150	4 - Sighting Lot has a confirmed sighting at a location, no movement has occurred (i.e. vet sighting)	003DNAM	200602221600	BOV	S
F436S78050403	87	3 - Moved Group/Lot out, Group/Lot of animals moved out of a premise	004FVMU	200511042205	BOV	S

Animal ID Number	Event Type Code	Reporting Premise ID	Event Date & Time	Species	Animal Breed
